Evaluation

GRADE = report/reusability (30%) + presentation (50%) + relative ranking (20%)

- report/reusability = 10 to 20 pages containing the proposed approach(es) and abandoned tracks + results with an analysis and discussion + link to git repository with code base
- presentation 12 mins + questions & answers 18 mins (max.): make sure everybody talks, be clear about your objectives/ proposals, discuss why these might work, show the results, analyse and discuss the results in particular the possible shortcomings
- ranking = number of challenges correctly tackled + expert's view on the utility of the obtained results (from LynRed)
